STANIČENÍ:

SMĚROVÉ POMĚRY:

The diagram illustrates a cross-section of a road intersection. The horizontal axis represents stationing from 0.000 to 0.500. The vertical axis shows elevations in meters above sea level (m.n.m.). The top profile line represents the terrain (TERÉN), and the bottom profile line represents the road grade (NIVELETA). The road width is 14.00 m. The diagram includes data for the intersection geometry, including the radius (R=3000 m) and the offset (y=0.135 m). The elevation of the road grade at the intersection is 165.882 m. The elevation of the terrain at the intersection is 165.783 m. The diagram also shows the elevation of the road grade at the edges of the road (162.241 m and 162.281 m) and the elevation of the terrain at the edges (162.241 m and 162.281 m). The diagram includes a table of elevations for the road grade and terrain at various stationing points.
