

Diagram illustrating the geometry and safety zones of a road intersection. The diagram shows a road crossing a railway track.

**Dimensions and Distances:**

- Distance from the center of the road to the center of the railway track:  $6,3\text{m}$
- Distance from the center of the road to the center of the railway track (perpendicular distance):  $1,4\text{m}$
- Distance from the center of the road to the center of the railway track (parallel distance):  $6\text{m}$
- Distance from the center of the road to the center of the railway track (diagonal distance):  $100^\circ$
- Distance from the center of the road to the center of the railway track (diagonal distance):  $4,2\text{m}$
- Distance from the center of the road to the center of the railway track (diagonal distance):  $1,1\text{m}$
- Distance from the center of the road to the center of the railway track (diagonal distance):  $7\text{m}$
- Distance from the center of the road to the center of the railway track (diagonal distance):  $5\text{m}$

**Labels and Markings:**

- SMĚR LITICE N. D.** (Direction Litice N. D.)
- SMĚR ŽAMBERK** (Direction Žamberk)
- HRANICE NEBEZP. PÁSMO** (Boundary of the danger zone)
- osa vozovky** (Road axis)
- RD** (Road sign)
- SMO T** (Traffic sign)
