

The image contains three architectural drawings of a building facade, likely for a residential or institutional structure. The drawings are presented in a clean, line-art style with a stippled texture for the walls.

- Top Left:** A side elevation showing a building with a gabled roof. It features a small, square window on the upper left and a taller, narrow rectangular window on the upper right. The lower portion of the facade is a solid, light-colored rectangular area.
- Top Right:** A front elevation of a two-story building. The upper story has a large, multi-paned window on the left and a smaller, square window on the right. The lower story features a long, narrow window on the left and a door on the right. The building is set on a hatched ground plane.
- Bottom Left:** A rear elevation of a building with a flat roof. The facade is a large, solid, light-colored rectangular area. The building is set on a hatched ground plane.
- Bottom Right:** A side elevation of a building with a gabled roof. It features four square windows arranged in a 2x2 grid. The building is set on a hatched ground plane.
