The Contracting Authority received a written request from a participant in the Procurement Procedure for clarification of the Tender Documentation.

The Contracting Authority hereby provides an explanation of the Tender Documentation (Procurement Terms and Conditions) for the above-mentioned Public Contract in accordance with Section 98 of the PPA, in both Czech and English, including the exact wording of the request for explanation of the Tender Documentation without identifying the participant requesting the explanation. In the event of a discrepancy between the different language versions of the answers, the Czech version of the Contracting Authority's answers shall prevail.

	<b>Question of the participant where the explanation was provided following a request for clarification</b>
<b>1.</b>	<p><i>The original question:</i></p> <p>Two of the panels contain sections, in total 4 landscape sections 1:250 and 4 NOH sections 1:200. We feel they are a bit too similar. We wonder if it's possible to change the scale of the sections, to be able to show the whole site in the landscape or more detail in the NOH. What can you tell us about this?</p>
	<b>Contracting Authority's explanation</b>
<b>1.</b>	<p>The contracting authorities recommend that the scale, panel layouts and positions of the sections be observed, as these have been selected with regard to the area concerned and the intended comparability of individual solutions in identical drawings. Sections "e", "f", and "c" describe the NOH and especially its foreground in different positions and have been chosen mainly with regard to the different height levels of the NOH, the Park and Opletalova Street and, needless to say, in relation to the tram line. The position of section "f" is identical with the position of the section in the measurement. However, their alteration at the participant's discretion with regard to the submitted solution will not constitute a reason for any negative assessment of the participant's solution or its exclusion from the Competitive Dialogue.</p> <p>Needless to say, additional situations/charts/diagrams/illustrations can be used in the other free areas in the panels (e.g., panel 2, 3, 7, and 8).</p>

	Question of the participant where the explanation was provided following a request for clarification
2.	<p><i>The original question:</i></p> <p>Can the proposed position of the sections be changed?</p>
	Contracting Authority's explanation
2.	<p>The contracting authorities recommend that the scale, panel layouts and positions of the sections be followed, as these have been selected with regard to the area concerned and the intended comparability of individual solutions in identical drawings.</p> <p>If you think it is suitable to show your solution in another specific section/scheme, we recommend you do so using the free areas in the panels (e.g., panel 2, 3, 7, and 8).</p>

	Question of the participant where the explanation was provided following a request for clarification
